ipn_nat_eshop-iphonenative

version :1.0

Iphone native applications run on the OS of the iPhone.It is written using objective -c and may use other framework from the OS.

EXTERNALMODULE

SBJSON
A strict JSON parser and generator for Objective-C. It adds categories to existing Objective-C objects for a super-simple interface. More flexible APIs are also provided for added control.

OCUnitReportGenerator
OCUnit report generator Library that generates Junit style report from OCUnit logger files. These sources needs to be added as sources for compilation available at ThirdParty/OCUnitReportLogger
